I. INTRODUCTION

A. An emergency or disaster will deprive substantial numbers of people of access to food or the means to prepare food. In addition commercial food supplies and distribution networks may be substantially disrupted due to partial or total devastation of food products stored in the affected area.

B. There also will be disruption of energy sources (e.g. - electricity and gas) causing most commercial cold storage and freezer facilities to be inoperable in the affected areas.

C. On the fringes of the affected areas, schools and small institutions with food inventories could be used to begin the feeding of disaster victims.

D. An effective feeding operation must be immediately initiated, to include but not limited to obtaining appropriate U.S. Department of Agriculture (USDA) food supplies, coordinating transportation of food supplies to designated sites within the disaster areas, and requesting the Disaster Supplemental Nutrition Assistance Program (D-SNAP) as required.

E. During the recovery phase, the D-SNAP program may be initiated as authorized.

II. PURPOSE

A. Coordinate and identify food requirements in disaster affected areas.

B. Procure and distribute food products to include USDA food to organizations engaged in mass feeding operations and/or staging areas within the affected areas.

C. Ensure the safety, stability, and security of the food supply (commercial and USDA Foods).

F. ESF-11 will coordinate with SC Department of Education (SCDE) and SC Department of Agriculture (SCDA) to obtain warehouse inventories and, if additional food supplies are needed. ESF-11 will coordinate the transportation of such supplies to food distribution sites, fixed meal sites or designated staging areas along with SCDE and SCDA.
