

SOUTH CAROLINA EMERGENCY OPERATIONS PLAN

BASIC PLAN

I. INTRODUCTION

- A. The State of South Carolina in accordance with South Carolina Regulation 58-101 is required to prepare for, respond to, and recover from emergencies and disasters.
- B. Emergency response personnel, equipment, and facilities will maintain a state of readiness to save lives, prevent or minimize damage to property, protect public health and provide assistance to all who are threatened by an emergency or become victims of a disaster.
- C. The State will coordinate emergency response and recovery operations with local and tribal governments, other states, the federal government, governmental and Non-Governmental Organizations (NGO), and private agencies or organizations.
- D. The Governor will determine the level and duration of commitment of State resources.

II. PURPOSE

- A. Establish a framework for how South Carolina State Agencies conduct all-hazards emergency response and recovery.
- B. Support local and tribal government disaster operations with timely, effective deployment of State resources.
- C. Keep the State's populations informed about the situation and provide them information on how they can protect themselves.
- D. Coordinate response and recovery operations when requirements exceed the capabilities or availability of the local government's resources.
- E. Assess local needs and coordinate support from other states and the federal government as necessary and appropriate.

III. SCOPE

- A. Establishes the policies and procedures by which the State will coordinate State and Federal response to disasters affecting South Carolina and its citizens.
- B. Describes how the State will mobilize resources and conduct activities to guide and support local Emergency Management efforts through preparedness, response, recovery, and mitigation.
- C. Addresses the various types of emergencies likely to occur, from local emergencies with minor impact to catastrophic disasters.

- D. Describes the responsibilities of State agencies in executing effective response and recovery operations and assigns specific functions and responsibilities to the appropriate State agencies and organizations.
- E. Outlines the types of assistance private sector and voluntary organizations provide during event response.
- F. Identifies the actions the State Emergency Response Team (SERT) will initiate in coordination with County and Federal counterparts.
- G. Supports the National Incident Management System (NIMS) and the Incident Command System (ICS).

IV. PLAN STRUCTURE

- A. The SCEOP describes a statewide, integrated approach to incident management and includes overarching planning assumptions, roles and responsibilities, concept of operations, specific hazard plans and plan maintenance guidance.
- B. Annexes and appendices provide macro overviews from the coordination agencies with input from stakeholders.

V. ASSUMPTIONS

- A. Incidents may involve multiple hazards or threats.
- B. Incidents may occur with little or no warning affecting a single or multiple geographic area.
- C. Incidents may immediately or rapidly overwhelm the capabilities of local, county or tribal government response organizations.
- D. Local and tribal governments will manage disasters/emergencies utilizing resources within their jurisdictions.
- E. Incidents may require prolonged incident management and support operations that will transition into long-term recovery activities.
- F. Incidents may result in significant short-term and long-term economic impacts.
- G. Incidents may require assistance and integration of the Federal government.

VI. SITUATION

- A. The SCEOP integrates the results of the State Hazard Mitigation Plan (SHMP), State Preparedness Report (SPR), the Threat and Hazard Identification and Risk Assessment (THIRA), and other applicable local, tribal and state threat and hazard

data to develop and build the response and recovery core capabilities outlined in this plan.

- B. Threats and hazards addressed include, but are not limited to, the following:
 - 1. Natural Hazards: These include hurricanes, tropical storms, earthquakes, tsunamis, floods, fires, drought, heat emergencies, severe weather events, erosion, sink holes, landslides, and infectious diseases.
 - 2. Man-made Hazards: These include acts of terrorism and cyber-attacks, technological and infrastructure system failures, dam failures, hazardous material spills and radiological and nuclear material release, and other humanitarian relief operations.
- C. Cascading effects: No single threat or hazard exists in isolation and incidents may create multiple impacts. The SCEOP focuses on core capabilities that can address emergent impacts as part of crisis and contingency planning actions.
- D. Vulnerability analysis and hazard identification information can be found in Attachment F (Vulnerabilities and Hazards 2022).

VII. CONCEPT OF OPERATIONS

- A. General
 - 1. This Plan, and its Annexes and Attachments, support the National Response Framework (NRF).
 - 2. This plan is supported by the local, state, and federal organizational levels of Emergency Management.
 - 3. Preparedness, response, recovery, and mitigation are general responsibilities of all levels of government working together to provide a system to meet the needs of the public.
 - 4. Emergency operations will be initiated at the lowest level able to effectively respond to the situation.
- B. Emergency Support Functions
 - 1. The State has established Emergency Support Functions (ESF) with State agencies and volunteer organizations to support response and recovery operations in conjunction with the National Response Framework.
 - 2. A State agency within each ESF has coordinating responsibility for the coordination and implementation of the ESF.

3. By Executive Order, the designated coordinating agency will coordinate the development and preparation of Standard Operating Procedures (SOP).
4. Primary agencies, support agencies and volunteer organizations are incorporated into plans and annexes.
5. Additional State agencies may be required to support each State ESF.
6. ESFs and coordinating agencies are designated in the following table:

ESF	TITLE	COORDINATING STATE AGENCY
ESF-1	Transportation	SC Department of Transportation
ESF-2	Communications	SC Department of Administration, Division of Technology Operations
ESF-3	Public Works and Engineering	SC National Guard
ESF-4	Firefighting	Wildland Fires – SC Forestry Commission Structural Fires – SC Department of Labor, Licensing, and Regulation; Division of Fire and Life Safety
ESF-5	Emergency Management	SC Emergency Management Division
ESF-6	Mass Care	SC Department of Social Services
ESF-7	Finance and Administration	SC Emergency Management Division
ESF-8	Health and Medical Services	SC Department of Health and Environmental Control
ESF-9	Search and Rescue	SC Department of Labor, Licensing, and Regulation; Division of Fire and Life Safety
ESF-10	Environmental and Hazardous Material Operations	SC Department of Health and Environmental Control
ESF-11	Food Services	SC Department of Social Services
ESF-12	Energy	SC Office of Regulatory Staff
ESF-13	Law Enforcement	SC Law Enforcement Division

ESF	TITLE	COORDINATING STATE AGENCY
ESF-14	Initial Recovery and Mitigation	SC Emergency Management Division
ESF-15	Public Information	SC Emergency Management Division
ESF-16	Emergency Traffic Management	SC Department of Public Safety
ESF-17	Agriculture and Animals	Clemson University Livestock - Poultry Health
ESF-18	Donated Goods and Volunteer Services	SC Department of Administration, General Services Division
ESF-19	Military Support	SC National Guard
ESF-24	Business and Industry	SC Department of Commerce

C. SEOC Operating Conditions and Activation

1. The State has established a system of Operating Conditions (OPCON) levels.
2. These OPCONs increase the State's level of readiness and response capability on a scale from “3” to “1” with “3” being normal day-today operations with no known threats or expectation of activation, to “1” which is full activation and full response in progress. OPCONs will not necessarily progress sequentially from 3 to 1.
3. The SCEMD Director may order a change to the OPCON level and request representation from State agency coordinators and volunteer organizations.
4. With the SCEMD Director’s concurrence, the Chief of Operations will assign the OPCON levels appropriate for existing conditions or in accordance with the protocols contained in the various hazard specific plans.
5. State agencies or the SEOC may conduct some level of response operations at any OPCON level but responses requiring ESF-level coordination normally occur at OPCON 2. In addition, an increase to OPCON 1 is normally accompanied by a Governor’s State of Emergency and activation of the South Carolina Emergency Operations Plan (SCEOP).
6. The following chart describes the OPCON statuses as it relates to the SEOC’s required level of alert/response capability, expected ESF actions and status of the SEOC.

OPCON	Level of Alert/ Response Capability	ESF Actions	SEOC Status
3	<ul style="list-style-type: none"> • Normal operations/level of awareness. Enhanced monitoring as appropriate for situational awareness. 	<ul style="list-style-type: none"> • No expectation of activation • Telephone/email coordination 	<ul style="list-style-type: none"> • Cold (Systems on stand-by/not activated) • Actions and statuses tracked and coordinated by/through SWP and Operations/Duty Officer (non-scheduled work hours) and selected state agencies if appropriate. • See Duty Officer and SWP SOP for further details
2	<ul style="list-style-type: none"> • Enhanced level of awareness/alert • Partial response capability • Activation of EOP and specific hazard plan as required • Activation of Joint Information Center (JIC) as required 	<ul style="list-style-type: none"> • Partial activation • Selected ESFs direct coordination/presence in SEOC (Ops determined) • Telephone/email coordination with remaining ESFs/SERT • ESF-15 (Public Information) activated as required • ESF support and support agency personnel available for use or activation 	<ul style="list-style-type: none"> • Hot (Systems activated and operating) • Actions and statuses tracked and coordinated by SEOC Operations
1	<ul style="list-style-type: none"> • Full alert • Response activities in process 	<ul style="list-style-type: none"> • Full activation • ESFs/SERT direct coordination/presence in SEOC (Ops determines otherwise) • ESF support and support agency personnel activated or available for activation 	<ul style="list-style-type: none"> • Hot (Systems activated and operating) • Actions and statuses tracked and coordinated by SEOC Operations

D. Plan Activation

1. The SCEOP is normally activated in response to emergency or disaster events. However, SCEMD maintains an active approach to Preparedness, response, recovery and mitigation at all times.
2. The full activation of the SCEOP, to include response and recovery, occurs under the following conditions:
 - a. State of Emergency
 - (1) When an emergency or disaster has occurred or is imminent, the Governor may issue an Executive Order proclaiming a State of Emergency or activate the emergency response, recovery and mitigation aspects of State and inter-jurisdictional disaster plans.

- (2) A State Executive Order is required for the deployment and use of State personnel, supplies, equipment, materials and/or facilities.
 - (3) SCEMD will provide recommendations to the Governor and assist in formulating the Executive Order.
 - b. The Governor or his/her designee may execute the SCEOP to support local situations when local resources are not adequate to sustain an effective response operation or when a significant State presence is required for immediate assistance.
 - c. If disaster threatens prior to the ability of the Governor to issue an Executive Order proclaiming a State of Emergency, the SCEMD Director is authorized to activate the Plan and implement any emergency response actions necessary for the immediate protection of life and property.
3. During a response to an emergency/disaster situation, the Governor may appoint a State Coordinating Officer (SCO), usually the SCEMD Director, to manage the response and/or recovery.
4. The Governor may verbally issue a State of Emergency or activate the SCEOP, and then complete the written Executive Order.
5. Activation and implementation of the SCEOP addresses operational priorities, including but not limited to:
 - a. Life, Health and Safety
 - (1) Immediate life safety is always the number one priority of any activation.
 - (2) SCEMD staff, SERT members and others will adhere to the SCEMD routine safety procedures as per agency policy.
 - (3) Refer to the SEOC SOP for additional security measures during activations.
 - b. Property Protection
 - (1) ESF 13 coordinates law enforcement protective measures at the SEOC for any statewide response. ESF 13 coordinates law enforcement requests with local officials in evacuated areas in support of protective measures, safeguarding of critical facilities and access control to disaster areas as requested. For additional information, refer to Annex 13, (Law Enforcement), to the SCEOP.

- (2) When the SEOC is fully activated for a major event staff of the Department of Parks, Recreation and Tourism (PRT) will supplement the security of the facility. Security officers will be stationed at the main entrance reception desk as well as conducting roving patrols of the exterior on a periodic schedule. When PRT is not present, the State Warning Point will maintain the routine access control as directed by the Chief of Operations.

c. Environmental Protection

- (1) Environmental protection is divided between two main response functions areas during an incident/disaster.

- (a) The SC Department of Health and Environmental Control (SCDHEC) is the Lead Agency for the coordination of ESF-10 administrative, management, planning, preparedness, mitigation, response and recovery activities to include developing, coordinating, and maintaining the ESF-10 Standard Operating Procedures (SOP), which detail both radiological and non-radiological responsibilities.

- [1] Non-Radiological or chemical refers to non-radioactive hazardous substances or materials in a quantity or form that poses a risk to health and safety.

- [2] Radiological refers to radioactive hazardous substances or materials in a quantity or form that poses a risk to health and safety.

- (b) The SC National Guard is the Lead Agency for ESF-3 and is responsible for the coordination of all ESF-3 administrative, management, planning, training, preparedness, mitigation, response, and recovery activities to include developing, coordinating, and maintaining the ESF-3 Standard Operating Procedures (SOP). The SC National Guard will coordinate with all supporting and other appropriate departments/agencies and organizations to ensure continual operational readiness. ESF-3 will coordinate with and/or support ESF-10, in order to provide overall guidance concerning water supply matters and provide guidance for sewage treatment and solid waste disposal as required. ESF-3 will

coordinate with SCEMD, other ESFs and other ESF-3 agencies to coordinate and support the provision of:

- [1] Emergency power and support of restoration of water and sewer services as needed
- [2] Debris management to include; clearance, removal, and disposal of contaminated and uncontaminated debris from public property
- [3] Water (potable and non-potable)
- [4] Engineering activities as required
- [5] ESF-3 will support, cooperate and coordinate with other ESFs to ensure State assets are deployed effectively and in response to appropriate priorities for the protection of the health, safety, and welfare of State citizens.

d. Restoration of Essential Utilities and Program Functions

- (1) Following a disaster or large-scale event, the State will support local governments in restoring identified critical functions, services/programs, vital resources, facilities, and infrastructure to affected areas.
- (2) Rapidly creating a safe and secure environment for response and recovery and assisting local jurisdictions in conducting those tasks are the priorities of work and resourcing.
- (3) Infrastructure systems facilitates the integration of the capabilities of state and federal government and voluntary agencies in support of local, county, and tribal governments and other infrastructure owners and operators efforts to achieve recovery goals relating to the State's multiple infrastructure systems.
- (4) Restoration of the facilities below are critical to sustaining the population during an incident. Priorities to these areas are key to ensuring the health and well-being of our citizens.
 - (a) Transportation – Infrastructure
 - (b) Communications – Infrastructure
 - (c) Water and Wastewater – Infrastructure/Natural Resources

- (d) Health and Medical Services – Health and Social Services
- (e) Mass Care – Housing/Infrastructure
- (f) Energy – Infrastructure
- (5) For additional information, refer to the SC Recovery Plan, Appendix 6 to the SCEOP.

e. **Critical Infrastructure Identification and Prioritization**

SCEMD recommends counties and state agencies utilize a levelled approach to determine prioritization of critical infrastructure restoration:

- (1) Level 1 - Vital to a jurisdiction; must stay operational at all times or receive highest priority for immediate restoration (e.g., E911 facilities, major bridges, EOCs, etc.).
- (2) Level 2 - Any infrastructure necessary to support initial rescue/recovery operations or to maintain public safety; must be operational or have restored capability within 24 hours following a disaster (e.g., hospitals, police stations, fire stations, emergency shelters/schools, etc.).
- (3) Level 3 - Any infrastructure that enhances long-term recovery operations; must be operational or returned to operational status within 48 hours following a disaster. Provides the capability for evacuees to return (e.g., airports, electrical utilities, water treatment, pumping stations, sewage treatment plants, locations of deemed essential businesses, etc.).
- (4) Level 4 - All other infrastructure or systems deemed critical by local authorities.

f. **Stakeholder Coordination**

Designated coordinating agencies coordinate the development and preparation of Standard Operating Procedures (SOP), and annexes providing macro overviews, within their respective ESF spheres to respond to any hazard/disaster in support of the SCEOP. Support agencies and volunteer organizations are incorporated into those plans, SOPs and annexes.

E. Direction, Coordination and Control

1. Direction and control of a State emergency resides with the Director of the SCEMD, and the SEOC Command Section (Executive Group) [see Annex 5 (Emergency Management) for a listing of membership of the Command Section (Executive Group)].
 - a. The Director of the SCEMD will coordinate all State agencies and departments mobilized pursuant to this plan.
 - b. In the event of an emergency situation beyond local or County government's control capabilities, and to assure efficient response and use of resources, the SCEMD Director, under a State of Emergency declared by the Governor and at the direction of the Governor, may assume direct operational control over all or any necessary part of the emergency operations functions within the State.
2. The South Carolina Law Enforcement Division (SLED), in accordance with the SC Code of Laws, Section 23-3-15 (A)(8), will coordinate the State's Counter-Terrorism efforts and response to terrorist activities or events, including:
 - Prevention against, preparation for, response to, and crisis management of acts of terrorism, in or affecting this State
 - Coordination of federal grants associated with homeland security
 - Creation of councils appropriate to its mission
 - Service as the Governor's representative to the United States Department of Homeland Security (DHS)
3. SCDHEC, under the SC Code of Laws, Title 44, Chapter 4, exercises unique authorities and responsibilities for coordinating the State's response in the event of a Public Health Emergency. These authorities and responsibilities include specified Special Powers concerning:
 - Control of Property
 - Control of Persons
4. The State Forester and the Forestry Commission, in accordance with the SC Code of Laws, Title 48, Chapter 23, Section 86, are responsible for developing the State Forest Disaster Plan and coordinating the response to forest disasters, to include the following:
 - Immediately determining the extent of damage

- When conditions warrant, declaring that a forest disaster exists and notifying the Governor
- Assisting citizens and local governments on public and private land where life or health is in danger
- Assisting other State Agencies, utility companies and cooperatives, in the clearing of transportation routes, and power and communication lines
- Developing a Forest Disaster Plan to provide for systematic salvage and utilization of all forest products damaged by disasters of all types
- Declaring the forest disaster over, compiling a report of the disaster, and informing the Governor

F. National Incident Command System

1. The State of South Carolina has adopted NIMS, as outlined in DHS protocol, as the standard incident management structure within the State.
2. ICS is the standard for on-scene emergency management throughout South Carolina.
3. Each ESF Lead and Support agency will integrate the principles of NIMS and ICS into their respective ESF agency planning and response operations, and ensure their personnel are trained on the principles of both NIMS and ICS.
4. Incident Command
 - a. The senior on-scene official of the first response organization to arrive at an incident will assume command and organize the response in accordance with ICS principles.
 - b. The Incident Commander (IC) can be from a local unit of government or from a County, tribal, State or Federal agency, as long as he/she has the expertise, capability, and authority. The IC may change as the incident progresses.
5. Single Jurisdictional Areas
 - a. The established local contingency plan will determine the organizational ICS.
 - b. When the incident involves and affects multiple local geographical jurisdictions or areas not covered by local emergency response

organizations, the State or Federal competent senior official at the site will either:

- (1) Join an existing Incident Command or Unified Command.
 - (2) Establish a Unified Command if none exists.
 - (3) Assume Incident Command incorporating existing local efforts as Operations Section branches or otherwise as appropriate.
6. Local, Tribal, State, and Federal Interaction. When not specifically prescribed, a Unified Command consisting of local, county, tribal, State and Federal senior competent emergency response officials at the site is the preferred approach to integrating several levels of government.
7. Unified Command
- a. If the incident affects a wide geographic area, or if agencies with distinctly different capabilities need to perform several functions, a transition may occur from an Incident Command to a Unified Command.
 - b. The local IC, or a State or Federal On-Scene Coordinator (OSC) may recommend the formation of a Unified Command.
 - c. When a Unified Command is implemented, the local IC and the county, tribal, State and/or Federal OSC meet and take the following measures:
 - Agree to act in concert, or at least coordinate efforts
 - Agree on objectives, priorities and strategies
 - Recognize each other's authorities, capabilities, limitations, responsibilities, roles
 - Establish lines and methods of communication
 - d. The Unified Command Group may appoint a single person to carry out the command decisions. The various organizations will “unify” response functions (Planning, Operations, Logistics and Finance).
 - e. The Unified Command and response generally continue until the response is terminated, or the roles of all but one level of government have diminished to the point where the primary level of government provides a single Incident Command.

8. Seniority. Seniority is ranked according to competency and breadth of responsibility. Competency is determined by meeting the requirements of training and experience. All officials meeting the competency criteria are senior to those who do not, unless specifically charged with overriding authority applicable to the specific incident situation by State or Federal law.
9. Post-Emergency Operations. Use of ICS throughout a response and recovery is encouraged.

G. Operational Areas

1. A disaster could have significant impacts resulting in isolated areas and communities within the disaster zone from one another as well as from the State. The damage may make movement of human and material resources to the affected areas difficult, resulting in the need to target specific areas with a significant response effort.
2. SCEMD has coordinated and provided assistance to counties that have chosen to develop Operational Areas and Operational Area response protocols within their respective Areas of Responsibility. This was done in order to assist in conducting analysis of areas to determine potential resource requirements or shortfalls, and to assist in mitigating the effects of a disaster.

H. Evacuations and Shelter-In-Place

1. Evacuation is the controlled movement and relocation of persons and property necessitated by the threat of a natural, technological, or man-made disaster.
2. The evacuation of large numbers of people from vulnerable areas will stress the limited capabilities of the State's road network.
3. Emergency conditions and situations that may require evacuation include:
 - Hazardous Materials Incidents – Affected areas throughout the State.
 - Hurricanes – Designated coastal and inland evacuation zones, coastal areas, beachfront properties, low-lying areas around streams, and mobile home areas.
 - Fixed Nuclear Facilities – Designated areas inside the 10-mile Emergency Planning Zone (EPZ) surrounding nuclear power plants.
 - Dam Failures and Floods – Projected or affected areas of inundation below dams and low-lying areas around rivers, streams and swamps.

- Earthquakes – Affected areas throughout the State.
 - Weapons of Mass Destruction Incidents – “Downwind” affected areas throughout the State.
4. Depending on circumstances, one of four types of evacuation may be employed:
- a. **Local Evacuation.** An incident may pose a threat to a specific location or geographic area within a jurisdiction. Local officials or the Governor may recommend those citizens threatened leave the vulnerable area.
 - b. **State Mandated Evacuation.** During a mandated evacuation, the Governor, acting under the authority of Section 25-1-440, SC Code of Laws, may order and compel all citizens to leave the affected area.
 - c. **Mandatory Medical Evacuation**
 - (1) Under the terms of Section 25-1-440, SC Code of Laws, the Governor, under the advice of the Director of DHEC, may order licensed healthcare facilities (e.g., hospitals, nursing homes, residential care facilities, etc.) to evacuate.
 - (2) The Facility Administrators may submit a request through DHEC to the Governor for an exemption to the Mandatory Medical Evacuation Order for their facility.
 - (3) Mandatory Medical Evacuations normally, but not always, occur prior to the evacuation of the general population.
 - d. **Voluntary Relocation**
 - (1) It is assumed that as soon as the Governor initiates the first press conference for a particular event, then any number of the affected population may choose to voluntarily relocate at this point
 - (2) This form of evacuation is normally associated with hurricanes.
 - (3) Inland counties are not vulnerable to storm surge. However, they are at risk to the high winds associated with hurricanes.
 - (4) In order to protect their population, the inland Counties may find it necessary to relocate those living in vulnerable structures or sites to facilities more resistant to high winds.

- (5) The decision to issue a formal voluntary relocation order is the responsibility of each County or tribal government.
5. SCEMD will monitor conditions with the potential to require evacuation of any area(s) of the State and implement changes in OPCONs as necessary.
 6. In order to manage an evacuation and ensure involved organizations have timely and accurate information, the SEOC will establish a process for routine communications and coordination with all involved County Emergency Operations Centers (EOC). Examples of the necessary information are:
 - Characteristics of the hazard and associated events
 - Designated evacuation area, initiation times, and resource mobilization status
 - Current status of evacuation routes
 - Progress of resource pre-deployment
 - Status of available shelters
 - Estimated time to complete evacuation
 7. SCEMD will coordinate with affected counties, appropriate State agencies, Federal agencies, other States, and appropriate private sector sources in developing an evacuation recommendation for the Governor.
 8. SCEMD will notify the Governor and make recommendations as required.
 9. The SEOC will coordinate the operation with all appropriate departments/agencies.
 10. The South Carolina Department of Public Safety (SCDPS) is the Governor's Executive Agent for all traffic control issues before, during, and after an evacuation operation.
 - a. SCDPS is the Coordinating Agency for ESF-16 (Emergency Traffic Management) and will conduct evacuation operations as delineated in Annex 16 (Emergency Traffic Management).
 - b. ESF-16 (Emergency Traffic Management), in coordination with ESF-1 (Transportation) and local Emergency Management, will develop, coordinate and execute an Evacuation Traffic Management Plan as well as a Return Traffic Management Plan.
 11. The State will assist the county and tribal government efforts through Public Information activities with resources needed to inform the public and assist in the evacuation of the county's citizens.

12. After the threat has passed, the SCEMD Director, in coordination with appropriate State and County agencies, will assess the situation and make a recommendation to the Governor regarding rescinding the Evacuation Order.
13. Post evacuation activities will also include a review and critique of the regional evacuation and associated procedures to determine the need to modify the plan.
14. Sheltering-in-place may be warranted in situations where evacuation poses a greater risk of exposure or physical harm to a particular hazard or event. Shelter-in-place is a protective action that includes going indoors, monitoring media devices, closing all windows and doors, and in some circumstances closing off exterior vents, and turning off heating and air conditioning using outside air.
15. The term “go inside, stay inside” may be used in lieu of “shelter-in-place” in the event of a security event or incident that creates a credible threat to the physical safety of the population without the risk of danger warranting evacuation or sheltering-in-place.

I. Access Control and Re-Entry Operations

1. General

- a. Events will occur that encourage or require public evacuation from areas, or require local government to restrict or control access within a defined area. An area may be defined as a county, municipality, or as specified by geography.
- b. The counties, tribal governments and municipalities determine the need and level of access control within their jurisdiction, and when it is safe for their citizens to return.
- c. The State will assist the county and tribal government efforts through Public Information activities, with resources needed to provide and coordinate access control, and/or assist with and coordinate the return of the county’s citizens.
- d. Citizens will make decisions to evacuate or return to their homes based on available information.
- e. Non-evacuating citizens may have remained in the impacted areas, and evacuated citizens will want to return to their homes as soon as possible. Upon return, they may choose to remain even if their homes are damaged or destroyed.

- f. Public re-entry will not necessarily coincide with response and recovery. For example, re-entry may begin while preliminary damage assessment is ongoing (i.e., response), and will normally precede Federal Emergency Management Agency (FEMA) Disaster Recovery Center (DRC) operations or similar outreach operations, (i.e., recovery).
- 2. Access control and public re-entry are separate, distinct actions or operations.
 - a. Access Control
 - (1) General
 - (a) Access control is an attempt to manage access to an area by time and defined groups (e.g., responders, businesses, public, etc.).
 - (b) Access controls are designated locally, and resourced internally or augmented by other agencies.
 - (c) Access control requires detailed management and commitment of resources. Area or unified commands may be required to implement and manage local access control.
 - (2) The levels of access control are:
 - (a) No Access
 - [1] The area is too dangerous because of a known or suspected danger, or no information is available about the conditions in the area.
 - [2] Access is limited to only personnel necessary to conduct an evaluation of the area.
 - (b) Restricted Access
 - [1] The local authorities having jurisdiction over the area determines who is or is not authorized to enter the area.
 - [2] Access to the area is limited to personnel, agencies or organizations necessary to address the issues or conditions preventing the return of the population (e.g., utility and

infrastructure repair teams, emergency responders, etc.).

- (c) Open Access. There are no restrictions on access to the area.
 - (3) Additional permissions, restrictions and associated control mechanisms are at the discretion of the county or jurisdiction (e.g., escorting media into a restricted area, checkpoints that require identification in order to enter an area, etc.).
- b. Public Re-entry
- (1) Re-entry occurs when the general population returns to the impacted area following an evacuation.
 - (2) The terms used to describe to the public the message regarding return (re-entry) are:
 - (a) Too Dangerous to Return
 - [1] Conditions in the area are unsafe for the return of the public.
 - [2] Traffic control measures are in place to control and restrict access.
 - (b) Limited Return
 - [1] The area is unsafe for the return of the public but the situation allows for limited visits for specific purposes.
 - [2] Traffic control and security measures are in place to control access.
 - (c) Safe to Return
 - [1] The area is safe for the public to return.
 - [2] Traffic control and security measures are in place to assist the return of the population.

3. Responsibilities**a. State**

- (1) Assist the counties in providing information to the citizens both in the impacted area and outside of their borders. ESF-15 (Public Information) will coordinate the public messaging throughout all media markets within and adjacent to South Carolina to ensure message consistency.
- (2) Assist in coordinating measures between affected conglomerates, emergency planning zones, counties and local entities.
- (3) Prioritize, allocate and manage State resources in support of access and/ or re-entry operations (e.g., coordinating the consolidation or closure of shelters in host counties to coincide with opening of shelters in the impacted counties, supplementing county law enforcement operations, prioritizing debris removal assets to specified areas, etc.).
- (4) Establish and rescind Evacuation Orders in coordination with local and State officials, and county and state agency representatives. Note: Unless otherwise specified, no re-entry restrictions from the State will exist once the Governor rescinds the Evacuation Order.
- (5) In coordination with the counties, establish Unified or Area Commands as needed and requested or directed.

b. Counties

- (1) Conduct response and initial recovery (short-term) operations to include access control as required. Re-entry may occur at any time during these operations.
- (2) Establish access control procedures and public re-entry policies and procedures. Counties should coordinate these actions with adjacent counties.
- (3) Inform SEOC Operations of access control status and desired public message by area.

J. Interface with Tribal Governments

1. The Catawba Indian Nation is the only federally recognized Indian Tribe in South Carolina, and has sovereignty over tribal reservation lands located in York County.

2. The State of South Carolina will consult and coordinate with the Catawba Indian Nation on a government-to-government basis, and provide opportunities for the Tribe to have meaningful input into actions and decisions that may affect the Tribe or tribal resources.
3. By agreement, the Catawba Indian Nation will coordinate requests for emergency support, assistance or training, and assistance with emergency planning through their resident county (York County).
4. York County will ensure it coordinates its emergency operations plans with the Catawba Indian Nation, and that the county emergency planning takes into consideration any unique requirements of the Catawba Indian Nation.
5. The Catawba Indian Nation reserves the right to coordinate and communicate with and/or request assistance directly from the State or Federal emergency management organizations and governments when it is to the advantage of the Catawba Indian Nation.

K. Interface with Colleges and Universities

1. There are over 60 colleges and universities (public, private and private non-profit) located in South Carolina as well as numerous branch campuses of both in-state and out-of-state institutions.
2. The colleges and universities will coordinate requests for emergency support, emergency response, emergency resource requests, assistance or training, and assistance with emergency planning through their resident counties. Satellite campuses will coordinate their requests through their resident counties.
3. Colleges and universities should notify their county emergency management agency of any major incidents on campus and, in the event of an emergency event, coordinate their public information operations with the resident county's public information operations.
4. All information on federal or State support, event details, and statewide operations will come to the college or university through their resident county emergency management agency from SCEMD. This practice applies in both day-to-day information exchanges as well as during time of a disaster.
5. SCEMD will provide recovery and mitigation support in accordance with existing applicant guidelines.
 - a. Recovery
 - (1) Colleges and universities should coordinate their initial recovery support through their resident county.

- (2) During and immediately after a major event, public and private non-profit colleges and universities should provide damage assessment information to their resident counties as soon as possible. The damages will initially roll up to the State as a part of the county total.
- (3) In the event South Carolina receives a presidential disaster declaration, procedures for applying for federal disaster assistance will vary dependent on if the school is public, private, or private non-profit.

Public and private non-profit institutions may apply for federal disaster assistance through their resident county as a part of the county request for assistance or they may communicate directly with SCEMD as an individual applicant/sub grantee.

b. Mitigation Planning

- (1) Public/State colleges and universities are covered under the State Hazard Mitigation Plan (SHMP), as state agencies. These institutions are invited to participate in the 5-year SHMP update process, as well as the local county mitigation planning update.
- (2) For private non-profit institutions, they may participate fully in their county or municipality mitigation planning process. Participation includes being a member of the planning team and providing mitigation actions and priorities.
- (3) For-profit institutions are welcome to participate in the local mitigation planning process, but they are not eligible for mitigation grants under current guidelines.

c. Mitigation Grants

- (1) Public colleges and universities are eligible applicants for pre- and post-disaster mitigation grants. They should apply directly to FEMA through SCEMD for funding as an applicant.
- (2) Private non-profit colleges and universities should apply for pre-disaster mitigation grants funding through the jurisdiction or county in which they reside and may be able to apply for post-disaster mitigation grants directly.
- (3) Private for-profit colleges and universities are not eligible for federal mitigation grants under current guidelines.

6. Colleges and universities may coordinate directly with SCEMD for SCEMD sponsored or FEMA's Emergency Management Institute/FEMA resident training.
7. Colleges, universities, and their resident counties are encouraged to develop, coordinate and implement memorandums of agreement/ understanding to address the resource capabilities and resource needs of both the institution and the resident counties.

L. Continuity of Government

1. See the South Carolina Continuity of Government Plan (Limited Access only).
2. Continuity of Government (COG) is an essential function of emergency management and is vital during an emergency /disaster situation. State and local continuity of government is defined as the preservation, maintenance, or reconstitution of the civil government's ability to carry out its constitutional responsibilities.
3. Succession of Authority
 - a. The Line of Succession for State government and primary emergency support service agencies can be found in Table 4 (Succession of Authority and Pre-delegation).
 - b. All State Executive Officers, either appointed or elected, shall designate not less than three nor more than seven deputies or emergency interim successors for themselves (South Carolina Code of Laws, Title 1, Section 1-9-40).
 - c. Executive Branch (South Carolina Code of Laws, Title 1, Section 1-9-30). See Table 4 (Succession of Authority and Pre-delegation).
 - d. Legislative Branch (South Carolina Code of Laws, Title 2, Section 2-5-30). Each member of the General Assembly will designate not fewer than three nor more than seven emergency interim successors to administer his/her powers and duties.
 - e. Judicial Branch (South Carolina Code of Laws, Title 1, Section 1-9-70)
 - (1) The Supreme Court: The Governor shall designate, for each member of the Supreme Court, Special Emergency Judges in the number of not less than three, nor more than seven and shall specify the order of their succession.

- (2) Court of Records: The Chief Justice of the Supreme Court, in consultation with the other members, shall designate for each court of record except the Supreme Court, Special Emergency Judges in the number of not less than three, nor more than seven for each Judge of the Courts, and shall specify the order of their succession.
 - (3) Circuit Court: The Judge of the Circuit Court shall designate no less than three, nor more than seven Special Emergency Judges for courts not of record within that circuit and shall specify their order of succession.
4. Delegations of Emergency Authority
 - a. South Carolina Code of Laws, Title 25, Sections 25-1-420 and 25-1-450, establish the State authority for State, County, and municipal government preparation for and response to emergencies.
 - b. South Carolina Code of Laws, Title 25, Section 25-1-440, grants additional powers and duties to the Governor during declared emergencies.
5. Emergency Actions
 - a. The SCEOP assigns primary and support State agency responsibility to the various ESFs and other support activities. Specific emergency delegations are contained in this Plan.
 - b. The head of each executive department and other State commissions and departments will designate an individual as the emergency Point of Contact for that ESF.
 - c. Immediate emergency action response to ensure continuity of government, direction and control, human services, economic affairs, communications, energy, transportation and law and public safety may require the following:
 - (1) Relocation of the seat of government from its current location.
 - (2) Replacing primary officials with alternates if they are unable to fulfill their responsibilities.
 - (3) Relocation of vital records to sites less vulnerable to ensure greater safety and survival.

6. Preservation of Records
 - a. In order to provide normal government operations following an emergency or disaster, each department or agency must take actions to protect essential records.
 - b. Agencies/departments are encouraged to inventory and prioritize their vital records. Each agency retains copies for day-to-day operations while preserving the master copies in a central storage facility. Each agency/department should arrange safekeeping for those records it deems important, but not selected for priority protection.
 - c. Agency personnel must have access to and use of these records and systems in conducting their essential functions. Plans should account for identification and protection of vital records, systems, and data management software and equipment, to include classified or sensitive data as applicable, necessary to perform essential functions and activities, and to reconstitute normal agency operations after the emergency.
 - d. Agencies should regularly update duplicate records or back-up electronic files.
 - e. Each department or agency must maintain accountable and auditable records for the use of any resource (personnel, supplies, meals, equipment, etc.) in support of any emergency or disaster.
7. Protection of Government Resources
 - a. Essential functions enable State agencies to provide vital services, exercise civil authority, maintain the safety and well-being of the general populace, and sustain the industrial/economic base.
 - b. The success of agency operations at an alternate facility is dependent upon the availability and redundancy of communications systems to support connectivity to internal organizations, other agencies, critical customers, and the public.
 - c. When identifying communications requirements, agencies should take maximum advantage of the entire spectrum of communications media likely to be available in any emergency. These services may include, but are not limited to, secure and/or non-secure voice, fax, and data connectivity, internet access, and e-mail.
 - d. The SC Department of Administration, Division of Technology Operations (DTO) has promulgated security rules for data

processing records and systems, which include emergency preparedness requirements.

M. Continuity of Operations

1. See The South Carolina Continuity of Operations Plan (Limited Access only).
2. The policy of the State of South Carolina, in concert with Federal Emergency Preparedness Procedures, is to have in place a program to ensure continuity of mission essential state emergency functions under all circumstances.
3. To support this policy SCEMD has implemented the Continuity of Operations Program.
4. State agencies are required to:
 - Establish a Continuity of Operations Plan (COOP) and procedures that delineate mission essential functions
 - Specify succession to office and the emergency delegation of authority
 - Provide for the safekeeping of vital records and databases
 - Identify alternate operating facilities
 - Provide for interoperable communications
 - Validate the capability to continue mission essential functions through tests, training, and exercises
5. SCEMD has developed a SERT COOP that identifies State alternate/continuity facilities, along with the processes and procedures to provide mission essential functions.
 - a. Primary Emergency Operations Center
 - (1) The SEOC is the facility from which the State coordinates, directs and responds to disaster emergencies.
 - (2) It is the designated headquarters for the Governor when he is directing State response to disasters.
 - (3) Representatives of State agencies and other personnel, as required staff the SEOC.

- (4) The coordination of a State response, as well as a Federal response, will come from the SEOC, under the direction of the Governor.
- b. **Alternate Emergency Operations Center**
 - (1) The Alternate Emergency Operations Center (AEOC) for State Emergency Operations is in driving distance of the SCEMD facility and is within the Columbia Capital Region.
 - (2) The SERT is capable of conducting operational coordination from that location.
 - (3) Coordination for all emergency operations will occur at the AEOC but space limitations will require most agencies to conduct internal agency-level coordination at their organizational facilities.
 - c. **Agencies**
 - (1) All State agencies are encouraged to have in place a viable COOP and program capability to ensure continued performance of all mission essential functions.
 - (2) All agencies will prepare for the possibility of unannounced relocation of mission essential functions and/or staffs to alternate/continuity facilities.
 - (3) These COOP facilities will be capable of supporting operations in a threat-free environment, as determined by the geographical location of the facility, a favorable assessment of the local threat, and/or the collective protection characteristics of the facility.

VI. DISASTER INTELLIGENCE AND COMMUNICATIONS

- A. **Information Planning.** In order to effectively respond to disasters the State considers the following when developing response and recovery plans:
 1. **Type of disaster.** Specific plans for hurricane, earthquake and other disasters are in place and outline the approach the State will take as it responds.
 2. **Severity of the disaster.** Computer based planning aids, such as HAZUS, allows planners to estimate damages from natural hazards disasters based on severity.

3. Possible effects on the citizenry. This is critical information in planning for medical and sheltering requirements both pre and post event. The pre-positioning of medicines, response personnel and the opening of shelters require complete and accurate information.
4. Critical infrastructure and lifeline sector information. Resources may be prioritized in order to restore key infrastructure facilities across lifeline sectors and equipment.
5. Resources available for response at all levels of government. The location, capabilities, quantity and response time is information needed in order to develop action plans, identify shortfalls and manage resources.

B. Information Collection and Dissemination

1. It is important to obtain and disseminate the most current and accurate disaster related information possible.
2. Standardized Map Systems. In order to help improve the effectiveness, and standardize and streamline operations, in displaying and sharing information, SCEMD and FEMA established the U.S. National Grid (USNG) system as the common coordinate system.
3. In order to conduct effective information collection and dissemination, SCEMD will use the State Warning Point (SWP), Palmetto, Regional Emergency Managers (REM), and County and municipal governments.

a. State Warning Point

- (1) Provides the State with a 24-hour, single point, emergency communications center to receive and disseminate information, and initiate warnings and notifications to governmental officials at all levels of a situation that could threaten the general welfare, health, safety, and/or property of the State's population.
- (2) Monitors, collects and disseminates essential disaster intelligence information, specifically as it relates to loss of life and property damage.
- (3) Utilizes multiple manual and electronic communication networks composed of Federal, State, and local emergency systems, as well as public warning systems to alert State agencies, officials, and threatened populations.
- (4) Specialized SWP communication capabilities include:

- State Telephone System

- Cellular phone
 - Satellite phones/radios
 - Telephone bridging
 - 800 MHz or PAL 800 radios
 - Local Government Radio (LGR)
 - Emergency Notification System
 - National Alert Warning System (NAWAS)
 - Emergency Alert System (EAS)
 - Palmetto
 - Text phones such as Telecommunications Device for the Deaf (TDD) or Text Telephone Relay (TTY)
- (5) The SWP maintains the Emergency Satellite Communications System (a dedicated voice and data system) which links the SWP with each County Warning Point, the National Weather Service (NWS), the Emergency Alert System Control Stations and the State's Fixed Nuclear Facilities. This system is used to transmit, receive, and coordinate emergency information.
- b. Palmetto is a web-based application that provides a statewide Common Operating Picture (COP), enhancing situational awareness for the SEOC and local EOCs. The system allows for continual communication of critical information between the counties and the SEOC, and provides a means for the affected Counties to request resources and monitor events taking place outside of their jurisdiction.
- c. Regional Emergency Managers
- (1) REMs are dispatched to counties threatened by or experiencing an emergency or disaster.
 - (2) The REMs provide an on-going assessment of the situation, technical assistance, and assist the Counties in coordinating local recommendations or resource requests to the SEOC.
- d. Counties. The counties whose emergency operations or EOCs are activated will maintain communication with the SEOC. Counties will update information on the disaster and forward requests for assistance as necessary.

C. Information Flow

1. Information obtained in the field, or from other sources, is made available to SCEMD as soon as possible. However, routing of the information is dependent upon the OPCON level.
2. In the event the SEOC is not activated, the SWP will receive information from sources throughout the State. The SWP, in accordance with its SOPs, records and notifies the EMD Duty Officer and the appropriate County EMD. SCEMD will notify State agencies, ESFs, and volunteer groups as required for further action.
3. When the SEOC is activated, the Operations Section will receive and disseminate information in accordance with the SEOC SOP. The information will flow from and internally between various sources including ESFs, State agencies, warning points, Palmetto, and personnel in the field.

D. Emergency Warnings

1. Providing emergency warnings to the public and all levels of government is essential to avoid or minimize loss of life and property if a disaster is imminent or has occurred.
2. The SWP serves as a contact to receive and disseminate emergency warning information.
 - a. SCEMD will coordinate with all appropriate departments/agencies and organizations to ensure timely warning readiness in case of a disaster or emergency.
 - b. SCEMD will make agreements and contracts to ensure State equipment and system maintenance on a 24-hour-a-day basis.
 - c. SCEMD will maintain and test alternate warning systems for use in the event the existing primary system is damaged and rendered inoperable.
 - d. The SEOC or SCEMD will notify other EOCs, FEMA Region IV, other States, major cities and County Emergency Management organizations whenever the potential for an emergency exists.
 - e. In the event of an imminent or actual disaster, SCEMD will initiate actions to warn local governments and other State agencies by all means necessary.
 - f. The Counties will provide warning capability on a 24-hours-a-day basis.

- g. Local governments will prepare plans and procedures for employment of local warning procedures utilizing all available systems and networks.
- h. A variety of warning systems are available for use during emergency operations.
 - (1) SCEMD/SEOC will receive Weather Advisories from the NWS using the National Warning System (NAWAS) and other electronic means. SCEMD/SEOC will forward weather advisories throughout State and local communications networks to alert local governments to conditions.
 - (2) Emergency management, public safety and public health organizations primarily use the Emergency Notification System to contact either a localized segment of the public, threatened populations, or specialized groups, such as hospitals and response teams.
 - (3) The Emergency Notification Network (ENN) is available for use during nuclear power plant emergencies.
 - (4) Emergency information may be received and transmitted using the SLED National Crime Information Center (NCIC), a nationwide information system.
 - (5) SCEMD/SEOC will use the Emergency Alert System (EAS) and/or CodeRED to notify the public of emergency conditions.
 - (6) The SWP maintains a capability to use numerous radio systems and networks to provide a statewide emergency warning system including the SCEMD Local Government Radio (LGR) network, the 800 MHz State radio system, satellite connections, high frequency radio and amateur radio

E. Public Information Dissemination

- 1. See Annex 15 (Public Information)
- 2. Upon the Declaration of a State of Emergency by the Governor, ESF-15 (Public Information) will be the primary coordinating element in the dissemination of public information during emergency and disaster operations.
- 3. ESF-15 (Public Information) will release State government news releases to the media statewide and to national and international media as

appropriate, with priority consideration given to the media most able to effectively communicate with the at-risk population.

4. Processes to disseminate information of public interest will follow established Public Information channels [Radio, television (both broadcast and cable), print, news release, social media, and live interviews]
5. SCEMD's web page (www.scemd.org), the SCEMD Emergency Management app and its social media, along with other State agencies' webpages, will also provide timely information and dissemination of items of public interest.
6. ESF-15 (Public Information) may also utilize the Public Information Phone System (PIPS) to disseminate reliable, accurate, and "real-time" disaster related information to the citizens and visitors of South Carolina prior to, during and after the disaster.
 - a. PIPS is a state agency volunteer staffed customer service call center designed to respond to individual life-safety concerns and questions prior to and during declared emergencies.
 - b. During PIPS activation, information provided may include shelter locations, road closings, evacuation routes, detours, weather warnings, advisories, and specific school and government information.

F. Weather Surveillance

1. SCEMD will coordinate with the National Oceanic Atmospheric Administration (NOAA) [i.e., NWS, Southeast River Forecast Center and National Hurricane Center (NHC)] and SCDNR Meteorologists to maintain situational awareness of current and projected weather conditions.
2. SCEMD will communicate weather information to local governments and state agencies as required, and will utilize the information for the latest updates.
3. NWS weather information, including the Emergency Managers Weather Information Network (EMWIN), is available through both internet and direct satellite feed.
4. SCEMD monitors the USGS website and coordinates with USGS for a variety of planning initiatives. These information gathering efforts allow SCEMD to report up to date information to county emergency managers and includes:
 - a. Data and reports on real-time earthquakes, seismicity maps and statistics.

- b. Archive searches of the USGS online catalog for analysis and historical study
- c. SCEMD coordinates with USGS to access South Carolina-specific earthquake, fault, and seismicity information, and links to additional state resources (regional network recordings of earthquakes and crustal movements, maps, station information, real-time seismic waveforms).

G. Joint Disaster Intelligence and Assessment Cell

1. Intelligence analysis is a way of reducing the ambiguity of a situation. Analysts provide assessments/forecasts of emerging issues based on essential information requirements that assist in supporting decisions.
2. In conjunction with ESFs, SCEMD Plans section will coordinate, conduct, develop and lead the operation of the Disaster Intelligence Cell in order to produce intelligence assessments (Summary Risk Assessments and Executive Summaries), estimates, and other products in support of the Executive Group's priorities and decision-making process.
3. Disaster intelligence is a continuous process throughout any disaster/incident and covers the following main areas:
 - a. Defining the operational environment.
 - b. Estimating the future impacts on the operational environment utilizing lifeline sector data.
 - c. Evaluating the hazard/disaster.
 - d. Identifying and describing hazard/disaster specific most likely and most dangerous scenarios, to better inform leadership decision making.
 - e. Provide disaster intelligence and risk assessment products.
 - f. Provide GIS support to State Emergency Response Team planning and operations efforts.
4. Disaster intelligence products are disseminated and briefed to the Executive Group on a daily basis or as required.
5. When the SEOC is activated, the Plans Section will receive and disseminate the Graphic Intelligence Summary in conjunction with the SITREP and IAP.

6. When the cell is activated, information will initially flow from and internally between various sources including ESFs, State agencies, warning points, Palmetto, and personnel in the field, before analyzing, compiling and finalizing the information into the Executive group assessment in order to support the decision making process.

VII. ORGANIZATION AND ASSIGNMENT OF RESPONSIBILITIES

A. General

1. Most departments and agencies within the State government have emergency functions to perform in addition to their normal duties (See Table 2 – Organization for Emergency Operations).
2. Each department and agency is responsible for developing and maintaining emergency management procedures in accordance with the direction and guidance given in this Plan.
3. Specific responsibilities are outlined in separate Annexes of this Plan.
4. Responsibilities of certain organizations not part of State government are also addressed in appropriate Annexes.

B. Emergency Organization

1. Organizational responsibility assignments (i.e., ESF Primary and Support Agencies) covered by this Plan are found in Table 3 (State Emergency Support Functions Responsibilities Assignments).
2. Agencies or counties requesting outside assistance will coordinate the request through the Director, SCEMD and the Governor.

C. Roles and Responsibilities

1. **State Responsibilities.** SC Code of Regulations, Regulation 58-101 (State Emergency Preparedness Standards) outlines State Emergency Management responsibilities.
 - a. Develop a State-level emergency management organization involving all government agencies, private and volunteer organizations that have responsibilities in comprehensive emergency management within South Carolina.
 - b. Develop and implement a broad-based public awareness, education and preparedness program designed to reach a majority of the citizens of South Carolina, including citizens needing special media formats such as hearing impaired individuals.

- c. Support the emergency management needs of all Counties and tribal governments by developing reciprocal intra- and inter-state mutual aid agreements.
- d. Coordinate assistance from FEMA and DHS.
- e. Establish direction and control of a State response and recovery organization based on functional support groups, involving broad participation from State, private and voluntary relief organizations, and compatible with the Federal response and recovery organization and concept of operations.
- f. Develop and implement programs or initiatives designed to avoid, reduce and mitigate the effects of hazards through the development and enforcement of policies, standards and regulations.
- g. Train State agency personnel under each ESF on Emergency Management Assistance Compact (EMAC) procedures to include identifying agency resources to sustain emergency operations, prescribing anticipated needs on specific EMAC messages, and listing agency resources available for interstate and intrastate mutual aid missions.
- h. Ensure the overall SCEOP is consistent with current State and Federal guidance.
- i. Verify the plans accuracy through exercise evaluation and ESF training.
- j. Ensure communication between County and State government is channeled through the SCEMD and the respective County Emergency Management Agencies.

2. State Agencies Responsibilities

- a. Appoint a department or agency Emergency Coordinator, and alternate, to support SERT operations as assigned in this Plan.
 - (1) Emergency Coordinators will prepare and maintain assigned operational Annexes of this Plan and will develop SOPs appropriate to the agency execution of this function.
 - (2) Emergency Coordinators will have the authority to commit agency resources and expedite program operations in the provision and coordination of emergency services.
- b. Develop and maintain internal SOPs for the execution of primary functions in accordance with this plan.

- c. Assign personnel to augment the SERT in the SEOC in accordance with requirements set forth by the Director, SCEMD.
- d. Mobilize and utilize allocated and available resources to meet emergency or disaster requirements.
- e. Maintain a capability for the emergency procurement of supplies and equipment required and not otherwise available.
- f. Provide training as appropriate to personnel assigned to execute respective emergency functions in this Plan.
- g. Support EMAC by ensuring lead and support ESF agencies are trained on EMAC responsibilities, to include pre-identifying assets, needs and resources that may be allocated to support other states, and documenting related information in Palmetto.
- h. Identify and provide a Liaison Officer for each Agency EMAC Request to facilitate arrival and onward movement of EMAC support at the appropriate Staging Areas.
- i. Maintain a 24-hour response team capability.
- j. Coordinate functional service provisions with local governments and private service organizations.
- k. Assist Federal representatives in providing emergency response or disaster assistance within the affected areas.
- l. Conduct workshops and seminars as necessary to provide information regarding new equipment and operating procedures for all governmental, service organizations and volunteer personnel participating in the implementation of assigned function.
- m. Provide all agency/department employees appropriate training to assure an awareness of the hazardous threats common to South Carolina and the overall State Emergency Management program.
- n. Review this plan annually and update assigned annexes and SOPs to meet current department policy and organization.
- o. Maintain current internal notification/recall rosters and communications systems.
- p. Participate in tests and exercises to evaluate this plan.

3. SCEMD Responsibilities

a. Preparedness

- (1) Prepare for emergencies and disasters by conducting comprehensive assessments of the threats to the State and update the SCEOP as required.
- (2) Establish procedures for the maintenance, distribution, and publication of this Plan.
- (3) Maintain a 24-hour Warning Point with ability to warn the public 24-hours-a-day.
- (4) Promote awareness, education and preparedness programs designed to reach all citizens.
- (5) Identify and maintain resources available for response.
- (6) Establish and maintain mutual aid agreements with Federal agencies and other States. Encourage mutual aid agreements with local governments and private industry.
- (7) Provide technical and planning assistance to State agencies and local and/or tribal governments upon request.
- (8) Establish and conduct an exercise and training program to test and evaluate State and local plans to maintain a high standard of preparedness.
- (9) Establish an appropriate level of operational readiness.
- (10) Initiate actions deemed necessary for effective implementation of this plan.
- (11) Maintain surveillance of potentially threatening conditions to and in South Carolina, and direct appropriate warning and response actions.

b. Response

- (1) Activate and operate the SEOC to a level appropriate to the magnitude of the threat when an event or potential event is first detected. See Annex 5 (Emergency Management) and the SEOC SOP for SEOC Organization and Duties.

- (2) Advise the Governor, State agencies, local government officials, and necessary Federal agencies of severity and magnitude of the emergency/disaster situation.
- (3) Manage the State's response effort through the SERT. SERT members operating in the SEOC are expected to follow ICS protocol.
- (4) Coordinate execution of the various Annexes of this Plan with the emergency activities of local governments, tribal governments, State government, private agencies and organizations, and the Federal government.
- (5) Upon declaration of a State of Emergency, provide public information through ESF-15 (Public Information) who will, in coordination with the Governor's Press Secretary, conduct public information briefings, news releases and coordinate all emergency information generated by State agencies and departments.
- (6) Upon the request of the Counties and/or tribal governments, deploy additional personnel and/or technical experts to assist in conducting damage assessments.
- (7) In the event the effects of the disaster extend beyond the State's borders or the State is affected by events in the adjoining state(s), provide Liaisons as necessary to the adjoining state(s) EOC(s) to enhance communications and coordination.
- (8) Initiate and Coordinate Federal Requests
 - (a) Upon occurrence of an emergency or disaster clearly beyond the capabilities and resources of State, local and tribal governments, the Governor may request assistance from the Federal government.
 - (b) If the disaster is of major or catastrophic classification, SCEMD will contact FEMA Region IV to request a FEMA Liaison or alert them the Governor may submit a formal request for Federal assistance.
 - (c) Upon request from the SCEMD Director, FEMA, Region IV will dispatch a representative to the SEOC to coordinate with the Director of the SCEMD, and

to provide assistance in accordance with the NRF, as appropriate.

- (9) Document the resources and personnel utilized by responding State agencies from the onset of the incident throughout the Recovery Phase.

c. Recovery

- (1) Begin initial planning for recovery before an emergency event impacts South Carolina.
- (2) Coordinate implementation of recovery programs while local and tribal governments are implementing response actions to protect public health and safety. Recovery activities include the development, coordination, and execution of service and site restoration plans for impacted communities and the reconstitution of government operations and services through individual, private sector, non-governmental, and public assistance programs.
- (3) Reference Appendix 6 (South Carolina Recovery Plan) of the SCEOP for specific recovery functions and program details.

d. Mitigation

- (1) Maintain and review the South Carolina Hazard Mitigation Plan (SHMP) annually, and update and publish changes as necessary.
 - (a) The SHMP serves as the State's operational and programmatic guidance to promote cost-effective measures to reduce hazard impacts.
 - (b) The SHMP encourages the development and implementation of local mitigation strategies and establishes a comprehensive program to effectively and efficiently coordinate the State's services and resources to make South Carolina's communities more resilient to the human, environmental and economic impacts of disasters.
 - (c) Mitigation measures may be implemented prior to, during, or after an incident.
 - (d) SCEMD conducts a comprehensive update of the Plan every five (5) years for submission to FEMA.

- (2) Implement the South Carolina Hazard Mitigation Plan.
 - (3) Develop and implement programs designed to avoid, reduce and mitigate the effects of hazards through the development and enforcement of policies standards and regulations.
 - (4) Promote mitigation efforts in the private sector by emphasizing business recovery plans and Continuity of Operations Plans (COOP).
 - (5) Reference Appendix 6 (South Carolina Recovery Plan) of the SCEOP for specific recovery functions and program details.
4. County Responsibilities. SC Code of Regulations, Regulation 58-1 (Local Emergency Preparedness Standards) outlines County Emergency Management Responsibilities.
- a. Preparedness
 - (1) Establish a formal Emergency Management organization to be charged with the protection of life and property in the County during an emergency.
 - (2) Conduct a comprehensive assessment of the threats to their County and develop a vulnerability analysis to identify hazards that may have a potential impact on the jurisdiction.
 - (3) Maintain a broad-based public awareness, education and preparedness program designed to reach a majority of their citizens, including those needing special media formats, such as the non-English speaking, and special needs requirements, such as the deaf.
 - (4) Develop a County Emergency Operations Plan (EOP), as required by SC Regulation 58-1, outlining the roles and responsibilities of the County Emergency Management organization during an emergency, which will be updated annually and certified by SCEMD.
 - (5) Operate a 24-hour Warning Point or develop a system, based on available resources, to provide for timely warning of the public and the dissemination of instructions for self-protection during an emergency.
 - (6) Establish and conduct an emergency preparedness exercise and training program.

- (7) Conduct emergency operations with support from within the jurisdiction and municipalities, and if needed, the State, and effectively support the conduct of such operations.
- (8) Develop and maintain procedures to receive and shelter persons evacuating within their County and from outside their County with assistance from the State.

b. Response

- (1) Implement their EOPs when an emergency occurs, at the request of the Director of the SCEMD, or upon a declaration of a State of Emergency by the Governor.
- (2) Activate their EOCs at the request of the SEOC during a major or catastrophic emergency in South Carolina. This action allows the SEOC to coordinate the delivery of intra-state mutual aid in an organized manner through the county government network.
- (3) Utilize the County EOC to serve as the central clearinghouse for information collection and coordination of response and recovery resources within the County, including the municipalities within the County.
- (4) Declare a local State of Emergency implementing local emergency authority.
- (5) Use all available local and regional resources to protect against and respond to an emergency to include utilizing pre-established mutual aid agreements.
- (6) Request additional resources through the County Emergency Management Agency or the County EOC directly to SCEMD, or if activated, the SEOC when Counties determine that local resources are not adequate.
- (7) Provide assistance to municipalities and request assistance through mutual aid or from the State when the requirements or resources needed exceed the municipal and county government's capabilities.
- (8) Upon receipt of an Evacuation Order or Rescission of an Evacuation Order, coordinate with ESF-16 to control the timing of evacuation and re-entry/return of the general population as the situation and public safety considerations allow.

- (9) Document the resources and personnel used from the onset of the incident throughout the recovery phase.
- c. Recovery
 - (1) Begin initial planning for recovery before an emergency event impacts the County.
 - (2) Coordinate implementation of recovery programs with local and tribal governments and the State/SEOC to protect public health and safety. Recovery activities include the development, coordination, and execution of service and site restoration plans for impacted communities and the reconstitution of government operations and services through individual, private sector, non-governmental, and public assistance programs.
- d. Mitigation
 - (1) Develop and implement programs designed to avoid, reduce and mitigate the effects of hazards through the development and enforcement of policies, standards and regulations.
 - (2) Promote mitigation efforts in the private sector with emphasis on local infrastructure.
 - (3) Identify critical infrastructures that may be impacted by disasters or required for emergency response.
- 5. Federal Responsibilities
 - a. Catastrophic Events.
 - (1) Upon hearing that a catastrophic incident has occurred, the Secretary of Homeland Security immediately begins, potentially in advance of a formal Presidential disaster declaration, implementation of the Catastrophic Incident Annex of the National Response Framework (NRF-CIA). Upon notification from the National Operations Center (NOC) that the NRF-CIA has been implemented, federal departments and agencies immediately:
 - (a) Take actions to activate, mobilize, and deploy incident-specific resources in accordance with the NRF-CIA.

- (b) Take actions to protect life, property, and critical infrastructure under their jurisdiction, and provide assistance within the affected area.
 - (c) Commence those hazard-specific activities established under the appropriate and applicable NRF Incident Annex, including the NRF-CIA.
 - (d) Commence functional activities and responsibilities established under the NRF Emergency Support Function (ESF) Annexes.
- (2) The federal response is designed to address no-notice to short notice incidents of catastrophic magnitude. When these type of events occur, the federal government will “push” pre-designated resources to a federal mobilization center or directly into the impacted area.
 - (3) For catastrophic incidents where planning is possible, an appropriately tailored package of federal assets and resources will be pushed to the appropriate federal mobilization center or staging area and will deploy upon request from the SEOC.
 - (4) Incident-specific resources and capabilities are activated and prepared for deployment to a federal mobilization center or staging area near the incident site. The development of site-specific catastrophic incident response strategies (as detailed in the NRF-CIA) includes the pre-identification of incident-specific critical resource requirements and corresponding deployment/employment strategies that accelerate the timely arrival of critically skilled resources and capabilities.
- b. The NRF outlines general Federal Emergency Management responsibilities.
- (1) Preparedness
 - (a) Develop plans and procedures detailing how the Federal Government will assist States in response to all levels of disasters.
 - (b) Through FEMA, maintain a regionally based system to expedite the flow of information and response to emergencies.

[1] The NRF provides guidance in preparation for Federal assistance to the States.

[2] To help ensure State/Federal coordination, FEMA Region IV's Regional Response Plan contains an Annex detailing South Carolina's Emergency Management System. This Annex refers to the SCEOP and unique operational activities the State implements when responding to disasters.

(2) Response

(a) Provide Federal assistance as directed by the President of the United States under the coordination of FEMA and DHS, and in accordance with federal emergency plans.

(b) Identify and coordinate provision of assistance under other Federal statutory authorities.

(c) Supplement State and local efforts by providing Federal assistance under governing secretarial or statutory authorities.

(d) Establish direct liaison between the Federal ESFs and their corresponding State ESFs.

[1] Through the NRF guidance, the Federal government provides assistance through its 15 designated ESFs (ESFs 1-15) in liaison with the State's ESFs 1-15.

[2] Because State ESFs 16 (Emergency Traffic Management), 17 (Animal/Agriculture Emergency Response), 18 (Donated Goods and Volunteer Services), 19 (Military Support), and 24 (Business and Industry) have no direct counterpart in the NRF, those State ESFs will establish liaison with members of the Incident Management Assist Teams (IMAT).

(e) Establish direct coordination with the State through a Federal Coordinating Officer (FCO) and/or a Principal Federal Official (PFO).

[1] In most disaster response situations, (i.e. situations covered by the Stafford Act), the President will appoint a FCO to coordinate

overall Federal incident management and assistance.

- [2] In other situation (i.e. situations not covered the Stafford Act) to The Secretary of Homeland Security may appoint a PFO to coordinate overall Federal incident management and assistance. The Secretary of Homeland Security has currently retained that authority and is the PFO.
- (f) Assist in development, review and process of the Governor's request for a Presidential Disaster Declaration.
- [1] Such a declaration makes available a series of Federal disaster assistance programs to aid the State in its recovery from a disaster situation.
 - [2] The basis for the declaration is the determination by the President that the disaster is of such severity and magnitude that response is beyond State and local capabilities.
- (g) To the extent that public law provides, channel Federal assistance through and coordinated with the Governor or the designated authorized representative.
- (h) Provide emergency response on federally owned or controlled property, such as military installations and federal prisons.
- (i) Provide direct Federal assistance to Indian reservations.
- (j) Assist the State and local governments in response to and recovery from a commercial radiological incident consistent with guidelines as established in the current Federal Radiological Emergency Response Plan and the NRF.
- (k) Coordinate the provision of non-radiological Federal resources and assistance to affected State and local governments through FEMA.

(3) Recovery

- (a) Assist the State in conducting recovery operations in accordance with the most current edition of the Appendix 6 (South Carolina Recovery Plan) of the SCEOP.
- (b) Initiate the Federal emergency recovery process under the National Disaster Recovery Framework (NDRF), which occurs when the President of the United States issues a Presidential Disaster Declaration.
- (c) Reimburse response and recovery claims utilizing the authority of the FCO as authorized by the Stafford Act.

[1] Upon declaration of a major disaster, Federal assistance to disaster victims may become available from three program areas:

- Individual Assistance
- Public Assistance
- Hazard Mitigation

[2] The administration of these programs may be coordinated through a joint Federal/State effort in a Joint Field Office (JFO).

[3] Federal Individual and Public Assistance programs will be administered in accordance with the administrative plans submitted to FEMA post-event.

(1) Mitigation

- (a) Coordinate with the State Hazard Mitigation Officer and the Department of Natural Resources for Federal mitigation programs for the State.
- (b) These programs include the National Flood Insurance Program (NFIP), Hazard Mitigation Grant Program (HMGP), Building Resilient Infrastructure and Communities program (BRIC), and Flood Mitigation Assistance Grant Program (FMA).

VIII. ADMINISTRATION, LOGISTICS AND FINANCE

A. General

1. A large-scale emergency or disaster will place great demands on the resources of the State. Distribution of required resources may be made more difficult by the emergency itself.
2. Volunteer organizations provide an excellent resource to support logistical and administrative disaster response and recovery.
3. Coordination between State and local EOCs is essential for an effective logistical, financial and administrative response.
4. The State, County, local and tribal governments and agencies will conduct administrative and financial procedures in accordance with existing laws, rules and regulations.

B. Logistics

1. See Attachment A (South Carolina Logistics Plan).
2. Initial priority for the distribution of supplies is generally to food, water and medication. The Incident Action Plan will identify specific priorities. Additional requirements will be identified and resources provided as soon as possible.
3. Regional Staging Area
 - a. For major/catastrophic events, the Logistics Section within the SEOC may establish, manage, and support a Regional Staging Area (RSA).
 - b. There are multiple identified RSAs in the State, as well as a permanent warehouse facility located in Winnsboro SC.
 - c. When required, the RSAs will receive, support and organize response resources for deployment.
4. State agencies and departments may establish supplemental agreements with their respective counterparts from other States to adapt interstate compacts, mutual aid, and statutes.
5. Emergency Management Assistance Compact (EMAC)
 - a. South Carolina is a signatory of the EMAC that provides for mutual assistance (e.g., people, equipment, skills, etc.) between

participating member States in managing any emergency or disaster that is duly declared by the Governor(s) of the affected state(s).

- b. SCEMD's Director is South Carolina's Authorized Representative for the EMAC. SCEMD will coordinate all EMAC deployments to and from South Carolina.
- c. The assisting state will receive approval from its Governor before providing assistance. South Carolina will reimburse the assisting State for the cost of response when requested.
- d. Procedures for implementing the Compact are found in the *Emergency Management Assistance Compact: EMAC Operations Manual* (December 2017) published by the National Emergency Management Association.

C. Voluntary Organizations

1. Voluntary Organizations are organized and structured under ESF-18 (Donated Goods and Volunteer Services).
2. Coordinate with government agencies to ensure a broad and comprehensive coverage of assistance and relief during emergencies.
3. Provide and coordinate relief not provided by government on a complementary and supplementary basis.
4. Coordinate and develop mutual aid agreements and memoranda of understanding (MOU) of duties and areas of responsibility to be performed during emergencies.

D. Funding and Accounting

1. General
 - a. Non-Emergency Events
 - (1) State and Federal agencies can respond to local authority requests under existing statutory authority (DOT, DPS, DNR, Coast Guard, etc.).
 - (2) Requests coordinated through the Fire Marshal's Office under Firefighter Mobilization and filled by assisting counties will be treated as county-to-county mutual aid under the Statewide Mutual Agreement. Receiving counties will be responsible for reimbursing assisting counties.

- (3) SCEMD will provide funding as available for approved SC Helicopter Aquatic Rescue Team missions.
 - (4) National Guard and US Military can respond under local commander's authority for 72 hours but will seek reimbursement.
 - (5) Existing state warehouse stocks, of water, MREs, blue tarps, and sandbags will be available to counties at no cost.
 - (6) VOAD support will be available to counties at no cost.
 - (7) Costs not outlined above (ex. generators, special equipment, special teams, etc.) will be the responsibility of the county or requesting organization.
- b. State of Emergency Events
- (1) State agencies will respond under the SCEOP and limited funds may be available using existing state share accounts on approval of the Governor's Office.
 - (2) Requests coordinated through the Fire Marshal's Office under Firefighter Mobilization and filled by assisting counties will be treated as county-to-county mutual aid under the Statewide Mutual Agreement. Receiving counties will be responsible for reimbursing assisting counties.
 - (3) National Guard state active duty and equipment costs will normally be covered by the state.
 - (4) Existing state warehouse of water, MREs, blue tarps, and sandbags will be available to counties at no cost.
 - (5) Other costs (generators, special equipment, special teams, etc.) may have to be absorbed by requesting organization.
- c. Federally Declared Events
- (1) Events that qualify for federal assistance may not be immediately identified and there is no guarantee of federal funding until a federal disaster declaration is approved. Most incidents will initially start as a state of emergency event with funding guidance as outlined above.
 - (2) State funding may be available associated with federal assistance for the non-federal share, but applicants may have to pay a portion or all of those costs.

- (3) SCEMD has the responsibility for seeking reimbursements for the Emergency Management Assistance Compact and State executed contracts.
- (4) SCEMD has the responsibility for coordinating costs associated with Federal Mission Assignments.
- (5) Individual state agencies have the responsibility for seeking reimbursement for internal expenses including personnel overtime and support requirements.
- (6) State agencies will also be financially responsible and seek reimbursement for any special team mobilization and staging prior to receiving a formal county request. Examples include IMT, RMAT, WMD HAZMAT, Search and Rescue, and SWAT/Bomb.
- (7) Requests coordinated through the Fire Marshal's Office under Firefighter Mobilization and filled by assisting counties will be treated as county-to-county mutual aid under the Statewide Mutual Agreement. Receiving counties will be responsible for reimbursing assisting counties.
- (8) Requests filled by assisting counties (including requests coordinated through Firefighter Mobilization) will be treated as county-to-county mutual aid under the Statewide Mutual Agreement. The SEOC will coordinate the request but will not be financially responsible for reimbursing assisting counties. Receiving counties will be responsible for reimbursing assisting counties and will file for federal reimbursement.

2. State

- a. Agencies will initially fund emergency operations from existing agency accounts.
- b. Each agency must have approval by the Department of Administration Executive Budget Office, State Treasurer and Comptroller General or a higher authority (Governor, State Fiscal Accountability Authority, and State Legislature) to exceed budget authority for emergency operations.
- c. If the emergency results in a presidential declaration, Federal funds will become available which is generally on a 75% federal share and 25% state/local share basis.

- d. Entities will conduct and account for expenditures of South Carolina funds for emergency operations in accordance with SC laws and regulations and their records are subject to audit by the State Auditor.
 - e. Utilizing emergency powers, the Governor may mobilize all available resources of the State government as necessary to cope with the emergency.
 - f. State agencies/departments and local and tribal governments are responsible for the collection, reporting and maintenance of records of obligation and expenditures incurred during a response to an emergency or disaster situation. These records will serve as a database in assessing the need and preparation of requests for Federal assistance.
3. County, Tribes, and Local Entities
- a. During emergencies, County, Tribes, and Local Entities may request logistical support through the submission of a resource request once all efforts to obtain the supply/commodity locally has been exhausted (see Attachment A - South Carolina Logistics Plan).
 - b. Counties, tribes, and local entities are responsible for all costs associated with any requests fulfilled through SCEMD, the National Guard, and/or federal agencies unless deemed otherwise by the SCEMD Director, The Adjutant General, or the Governor.
4. Federal
- a. Federal funds made available to the State pursuant to an emergency or disaster program will be, to the extent provided by law, channeled through the Governor or designated representative.
 - b. Use of Federal funds is subject to audit and verification by State and Federal auditors.
 - c. Local and tribal governments and heads of State agencies and departments will establish systems to report on and account for any public funds used for emergency or disaster purposes.
- E. Consumer Protection
- 1. The Department of Consumer Affairs will monitor emergency activities to provide protection to consumers.
 - 2. Individuals may initiate a complaint by calling the South Carolina Department of Consumer Affairs at 1-800-922-1594.

F. Protection of the Environment

1. All actions taken to repair and restore the environment by a government agency, individual, or private entity will comply with applicable South Carolina and Federal laws, rules and regulations.
2. Individuals or organizations may obtain additional information on requirements from SCDHEC.

G. Nondiscrimination

1. Discrimination against persons based on age, color, economic status, nationality, race, religion, sex or handicap in the administration of emergency services or disaster relief is prohibited.
2. Individuals may submit complaints of discrimination in reference to emergency operations or disaster relief to the local Emergency Management organizations for investigation and further action.

H. Duplication of Benefits

Federal law prohibits any persons, business concerns, or other entities from receiving federal disaster assistance when compensation for the loss has been received from an insurance company or any other source.

IX. PLAN DEVELOPMENT AND MAINTAINANCE**A. SCEOP Evaluation, Revision and Maintenance**

1. This plan is the principal source of documentation concerning the State's emergency management activities. Designated departments and agencies of State government are responsible for developing and maintaining a portion of this plan. The SCEMD Director is the overall process coordinator.
2. SCEMD will maintain, update and distribute all changes to this Plan. As a minimum, SCEMD and the respective ESFs will review this Plan and its Annexes on an annual basis accounting for changes in the operational environment, organizational design, and technology innovations and update them as necessary.
3. SCEMD has oversight of the annual reviews in cooperation with relevant Federal, State, volunteer and private sector organizations.
4. The Director of SCEMD will coordinate the efforts of all responsible departments and agencies for plan development and timely update/revision.

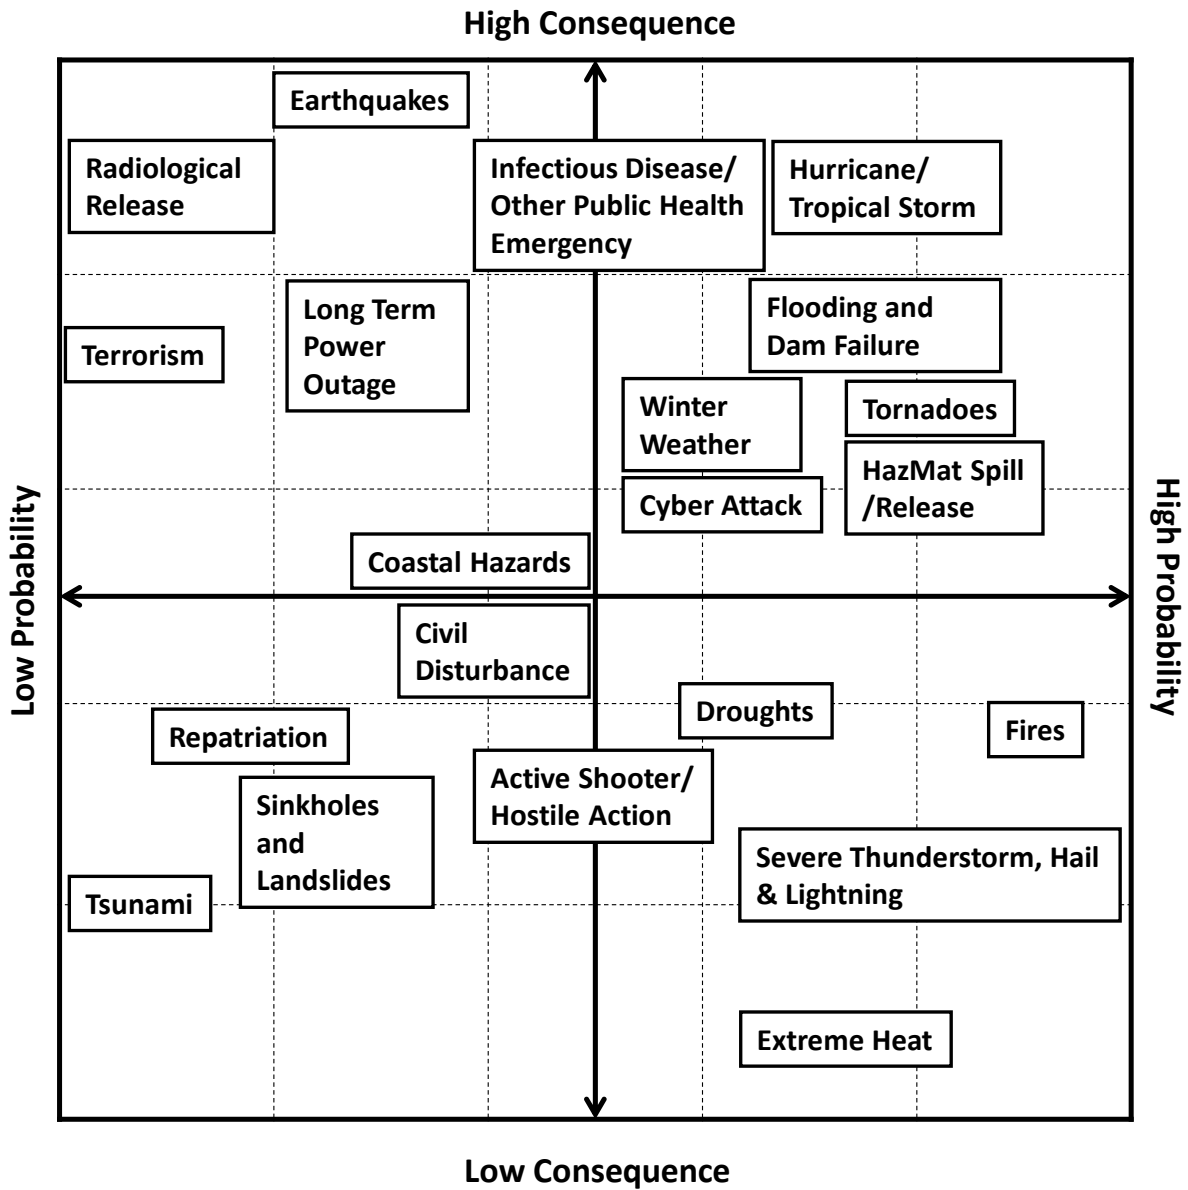

5. State Agencies/ESFs
 - a. Will develop and maintain internal SOPs for the execution of primary functions in accordance with this plan.
 - b. Review this plan annually and update assigned Annexes and SOPs to meet current department policy and organization.
 - c. Ensure the revisions to the Annexes are compatible with the policies set forth in the basic plan.
 - d. The ESF Lead Agency will forward a copy of the revised Annexes to the SCEMD Director when completed.
 - e. The ESF Lead Agency will provide an updated copy of detailed SOPs and manuals to the SCEMD Director within 15 days after date of completion.
 6. All organizations with assigned emergency-oriented missions or support roles are required to prepare supporting documentation (i.e., SOPs).
 7. Following each emergency or exercise, SCEMD will conduct an after action critique to identify problems or areas requiring corrective actions. SCEMD will take steps to address any problem identified and to ensure current policy and procedures are effectively implemented and reflected in this plan.
 8. Maintain a file of all SOPs.
- B. Strategic Planning
1. SCEMD maintains a five-year strategic plan, updated annually with input from stakeholders, which provides a long-range focus for the Division.
 2. SCEMD's five-year strategic plan is based on a self-assessment of capabilities and outlines objectives, strategies and measurable milestones to achieve desired improvement and goals.
 3. This plan serves as the basis to respond and recover from disasters and enhances the State's capability to prepare for and mitigate disasters.
 4. Each South Carolina County maintains a five-year strategic plan based on a local self-assessment of capability. The strategic planning process guides county preparedness and enhances their ability to implement emergency management, preparedness, response, recovery and mitigation.

C. Training and Exercise

1. SCEMD has designed a program to enhance the training of state, local, and volunteer personnel on their roles and responsibilities in the four phases of Emergency Management: Preparedness, Response, Recovery, and Mitigation.
2. The SCEMD training program ensures the operational readiness of the SERT and local governmental responders. Training includes emergency management courses, professional development seminars and workshops. Records of said training will be maintained for a minimum of 5 years.
3. SCEMD conducts hazard specific exercises to test established plans and procedures that are activated during an emergency at all levels of the Emergency Management system.

TABLE 4
SUCCESSION OF AUTHORITY AND PREDELEGATION

Continuity of government and direction of ESFs are essential during emergency operations. The following lines of succession are specified to ensure availability of a service coordinator/head of State offices. Permanent replacements shall be made as required or authorized by law.

Decision-making authority for the Executive Branch and each State office with primary ESF responsibilities is listed in descending order. The pre-delegated authorities will assume control when the primary decision maker is not available at time of emergency.

FUNCTION	SUCCESSION OF AUTHORITY
State Governance	<ol style="list-style-type: none"> 1. Governor 2. Lieutenant Governor 3. President Pro Tempore of the Senate 4. Speaker of the House 5. Secretary of State 6. State Treasurer 7. Attorney General
ESF-1: Transportation	<p>SC Department of Transportation</p> <ol style="list-style-type: none"> 1. Secretary of Transportation 2. Division Director of Engineering 3. Division Director of Finance and Administration 4. Division Director of Mass Transit 5. Chief Engineer of Operations 6. Chief Engineer for Planning, Location and Design

ESF-8: Health/Medical Services	<p>SC Department of Health and Environmental Control</p> <ol style="list-style-type: none"> 1. Agency Director 2. Director of Public Health 3. General Counsel 4. Director, Bureau of Public Health Preparedness
ESF-9: Search and Rescue	<p>SC Department of Labor, Licensing, and Regulation</p> <ol style="list-style-type: none"> 1. Director 2. Deputy Director for Administration 3. Deputy Director for Labor

FUNCTION	SUCCESSION OF AUTHORITY
ESF-10: Environmental and Hazardous Materials Operations	SC Department of Health and Environmental Control 1. Agency Director 2. Director of Environmental Affairs 3. General Counsel
ESF-11: Food Services	SC Department of Social Services 1. State Director 2. Deputy State Director for County Operations 3. Deputy State Director for Administration and Program Support 4. Deputy State Director for Program Policy and Oversight
ESF-12: Energy	SC Office of Regulatory Staff 1. Executive Director 2. Chief Operations Officer 3. Chief Legal Officer 4. Chief Financial Officer 5. Director of Safety, Transportation & Telecommunications
ESF-13: Law Enforcement	SC Law Enforcement Division 1. Director, SLED 2. Assistant Director, Chief of Staff 3. Assistant Director, Investigative Services 4. Assistant Director, Counter-Terrorism 5. Special Agent in Charge, Protective Services 6. Supervisory Special Agent, Protective Services
ESF-14: Initial Recovery and Mitigation	SC Emergency Management Division 1. Director 2. Chief of Staff 3. Chief of Operations 4. Chief of Preparedness
ESF-15: Public Information	SC Emergency Management Division 1. Director 2. Chief of Staff 3. Chief of Operations 4. Chief of Preparedness

FUNCTION	SUCCESSION OF AUTHORITY
ESF-16: Emergency Traffic Management	SC Department of Public Safety 1. Director 2. Deputy Director, Highway Patrol 3. Deputy Director, State Transport Police 4. DPS Emergency Management Coordinator
ESF-17: Agriculture and Animals	Clemson University Livestock-Poultry Health Division 1. Director and State Veterinarian , Clemson University Livestock Poultry Health 2. Associate Director and Associate State Veterinarian, Clemson University Livestock Poultry Health 3. Director, SC Meat-Poultry Inspection Department 4. Emergency Preparedness Veterinarian
ESF-18: Donated Goods and Volunteer Services	SC Department of Administration 1. Executive Director 2. Chief of Staff 3. Director, General Services Division 4. Innovations Director 5. General Counsel
ESF-19: Military Support	SC National Guard, OTAG 1. Adjutant General 2. Deputy Adjutant General 3. Chief of Staff 4. Director of Plans, Operations, and Training 5. Director of Logistics 6. U.S. Property and Fiscal Officer
ESF-24: Business and Industry	SC Department of Commerce 1. Secretary of Commerce 2. Deputy Secretary of Commerce 3. Assistant Manager, Small Business Development

TABLE 5
CONTINUITY OF OPERATIONS (COOP)

If threats or impacts to agency operations and/or facilities render core activities untenable, a COOP must be in-place and executed to ensure agency operations continue as required, and to ensure agency/support personnel, equipment, records, and procedures survive to allow continued/sustained operations.

The following primary, secondary and tertiary ESF lead agency assignments are specified to ensure the availability of an agency to continue ESF operations if COOP is implemented.

ESF	PRIMARY	SECONDARY	TERTIARY
Emergency Management	SC Emergency Management Division	N/A	
1 – Transportation	SC Department of Transportation	SC Department of Education	S.C. Department of Corrections
