EPZ ACCESS CONTROL IDENTIFICATION PROCEDURES

Local authorities are responsible for security and traffic control within their jurisdictions during all phases of a radiological incident. ESF-13 (Law Enforcement) will coordinate requests from local authorities when additional personnel/equipment is required. The following identification procedures are established to facilitate access of emergency workers, residents, utility personnel, and media representatives.

A. Public Safety/Emergency Workers

All uniformed public safety agents with proper identification will be allowed access to the restricted area. This includes, but is not limited to, police, fire, and emergency medical personnel.

Agency Identification Cards of State and federal non-uniformed emergency workers will be honored. Individuals in this category include State agency emergency workers, U.S. government field monitoring personnel, and state and local emergency management officials and staff.

B. Utility Personnel

Utility personnel are issued company identification cards and/or plant identification. Display of either form of identification indicates authorized access to the affected facility.

C. News Media

Members of the media should possess official identification from their employer organization. Media representatives will not be permitted to enter evacuated areas or go beyond two-mile roadblocks.

D. EPZ Residents/Business Owners

Residents/Business Owners of evacuated or restricted areas must possess specific written authorization from county emergency management officials. Passes for access will be issued at county EOCs or at designated access control points when activated.
